

General Ledger WorkCenter

The General Ledger WorkCenter is a configurable, central location where you can conduct transactions, run reports, and view data necessary to complete your work. The General Ledger WorkCenter also contains a list of links that are commonly used by users, such as CU ChartFields and the Central Information Warehouse (CIW).

General Ledger WorkCenter: Main	General Ledger WorkCenter: Reports/Queries
 <p>My Work: Contains items from your Worklist, such as Journal Entries awaiting approval, and can be configured to add additional work items.</p> <p>Links: Contains a list of pages that are commonly used, such as CU ChartFields, and can be configured to add additional links.</p>	 <p>Queries: Contains queries that are commonly used, and can be configured for additional queries.</p> <p>Reports/Processes: Contains reports that are commonly used, and can be configured to add additional reports.</p>
