

## Navigation Enhancements: Quick Access, Search, and Actions

Quick access to recently visited and favorites moved to the banner. Global search is now available from all pages, not just homepages. The Actions menu in the banner on homepages applies to system-level actions (e.g., New Window, My Preferences, Help, and Sign out), while the Actions menu below on the page, apply to page-level actions (e.g., Personalize Homepage and Refresh).
