

# Skillsoft Percipio: Step-by-Step Guide

## Creating Deep Links to Resources in Percipio

Deep linking lets you access Percipio resources directly from a website or PDF file. When a user clicks a deep link to a course in Percipio, the employee is taken to the launch page of the course. If prompted to log on to the employee portal, users should click the deep link again.

This guide provides describes steps for sharing content within the web Percipio platform. For instructions on sharing content using the mobile app, visit the following link:

[https://documentation.skillsoft.com/en\\_us/percipio/Content/B\\_Learner/Mobile/mbl\\_share\\_content.htm](https://documentation.skillsoft.com/en_us/percipio/Content/B_Learner/Mobile/mbl_share_content.htm)

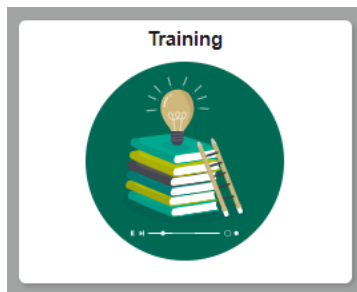

### Notes:

- For security purposes, University Information Services (UIS) asks that you do not insert deep links in emails.
- Employee Learning and Development (ELD) maintains a catalog, with deep links, at: <https://www.cu.edu/employee-services/eld/catalog>

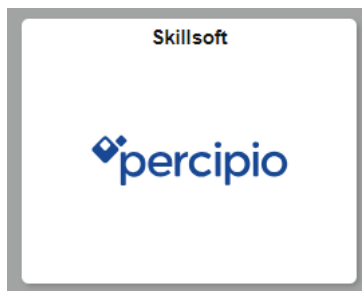

## Creating a Deep Link to a Course, Book, or Video

From the campus portal (my.cu.edu):

1. Click the **Training** tile.

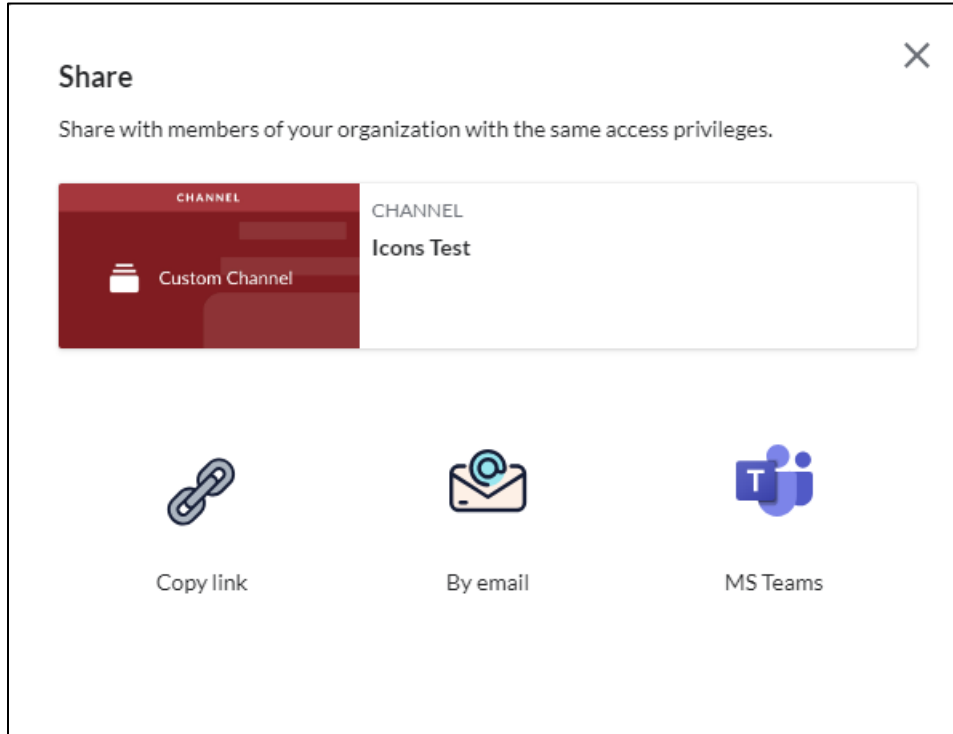

2. Click the **Skillsoft Percipio** tile.

3. Search for the content you want to share.
4. After you locate the course, click the **Share** icon . A Share popup window appears.

5. Click **Copy link**.

A message confirms that the link has been copied:

6. Paste the link in the needed location.
