

Early Adopters of Tracking Participation in Cvent [1]

January 21, 2024 by melanie.jones@cu.edu [2]

Different users and groups will adopt Cvent participation tracking at different rates with different approaches. Choose your approach to participation tracking [3] and then use that data for more relevant engagement with constituents [4]. The previous resources get into the technical details but the following success stories can inspire you and your team.

CU Denver | Monica Cutler

- **Tracking Method:** OnArrival [5]
- **Devices Used:** Two iPads purchased for events.
- **Free or Paid Events:** Free and paid
- **Event Size:** 15-200 registrants
- **Badges:** Print via MailMerge from the registration report.
- **Walk-ins:** Devoted check-in devices and area, separate area for walk-ins so we can use an on-site printer/label maker for walk-in name badges.
- **Data Use:**
 - Post-event surveys to attendees and no-shows to inform future events.
 - Analyze check-in times to determine the ideal event and program start times
 - Important for reporting CASE data and leadership briefs in CU Ascend (manually processed)

Success Story

Check out resources from a Nov. 2023 presentation by Monica Cutler (CU Denver). She has led her Alumni/Advancement team to embrace Cvent's technology to enhance day-of-event processes for a better attendee experience.

UCCS | Kayla Boyer

- **Tracking Method:** [OnArrival](#) [5]
- **Devices Used:** Borrowed iPads from other campus unit

- **Free or Paid Events:** Free
- **Event Size:** 15-500
- **Badges:** Print via MailMerge for small events and no name tags for larger events.
- **Walk-ins:** Devoted check-in device/area and attendees write their names on branded nametags.
- **Data Use:**
 - Post-event surveys to attendees and no-shows to inform future events.
 - Compare attendance rates for paid vs. free events to understand how fees impact attendance.

Presentation Slides [10]

CU Boulder | Tom Needy

- **Tracking Method:** OnArrival [5]
- **Devices Used:** iPads and Printers purchased from Event in a Box [5], Self Check-In
- **Free or Paid Events:** Free
- **Event Size:** 40-4,000

• **Badges:** Print onsite

Success Story

Family Weekend & Buffs Bash

Key Takeaways

- [OnArrival](#) [5] is the preferred method of tracking participation, regardless of having onsite staff to help check attendees in or a self-check-in area. It's great for large or small events, you need to have the right ratio of attendees to devices.
- Even if you are unsure what to do with event participation data today, doing so sets you up for success. Start tracking attendance now and you can [address how to use it down the road](#) [4]. For example:
 - Analyze check-in data to finesse your events.
 - Check-in time data can assess potential 'bottlenecks' for attendees. Prepare with additional onsite support or alter your event start time accordingly.
 - Access attendance rates for paid vs. free events to determine which events should be paid and the amount.
 - Engage those who have attended three events, by inviting them to a special event.
 - Send a survey to attendees and a different version to no-shows.
- Regardless of your resources, there is a viable option.
