### **Quick Tips**

#### **Marketing Cloud**

Determine what size your image should be <sup>[3]</sup> before uploading it to Marketing Cloud. Images should never be more than 600 pixels wide and even less depending on padding and layout.

#### **Cvent**

Easily add a calendar attachment <sup>[4]</sup> to the registration confirmation email. This feature is available for events only, not individual sessions.

### **General Updates**

#### **Marketing Cloud**

- **Fall 2024 Student Data Issue:** On the morning of Aug. 23, we discovered that Fall 2024 student enrollment data in eComm's Salesforce was significantly lower than expected across all campuses. Many students with recent enrollment changes were missing records or data. Due to the urgency, we escalated the issue to the University Information Services (UIS) Integrations Team as a priority 1 (P1). By 4 p.m. Aug. 23, the data was correctly synced, and reports of current students are now accurate. Refer to the email that went out to users on Aug. 23 <sup>[5]</sup> for impacts and next steps.
- **Auto-Replies Not Coming Through:** We've investigated the issue of auto-replies not reaching senders in Marketing Cloud. There is no setting within Marketing Cloud to change this as the root issue sits with email clients (Outlook, Gmail, Yahoo, etc.). The

only 'solution' would be reverting to the previous From Email Addresses used without the SAP domains. This would result in low deliverability rates, making it non-viable.
