

Use The Enter Key For Speedtypes [1]

August 9, 2011 by [Carl Sorenson](#) [2]

Here is a tip for most m-Fin reports, those that accept speedtype on the first page of prompting. It's a little thing, but I use it many times a day. You can enter one speedtype, or enter several separated by spaces. Then, instead of clicking the **Search** button with your mouse, use its keyboard shortcut: hit the enter key.
